Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/693,630	Applicant(s) SUBRAMANIAN ET AL.	
	Examiner Eric Woods	Art Unit 2628	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-35, drawn to a parser/translator and API, classified in class 717, subclass 328.
- II. Claims 36-67, drawn to scene graphs and data structures, classified in class 345, subclass 619.

Inventions Group I and Group II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because known prior art scene graph data structures (Steele et al, VRML, etc) and their parsers do not require the use XML, plural object levels, and the like. The subcombination has separate utility such as a specific parser for SVG and two-dimensional vector graphics with direct calling capabilities to underlying functional layers, and more specifically as optimized APIs for accessing interprocess communications between different layers of the running programs.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all

Art Unit: 2628

the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

During a telephone conversation with applicant's representative Jens Jenkins (44,803) on 31 October 2006, applicant's representative requested that a written restriction requirement be mailed. This Action is prepared as per that request.

Terminal Disclaimer

The terminal disclaimer filed on 10/23/2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US applications 10/693633 and 10/401717 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric Woods whose telephone number is 571-272-7775. The examiner can normally be reached on M-F 7:30-5:00.
